

The Intune Device Management Checklist

Every device you can't see or wipe remotely is a device you don't control

For IT teams with Intune licensed but not properly configured

-  **1. Autopilot enrolment for company devices**
No manual sign-in required for new hardware 
-  **2. App protection policies for BYOD**
Company data protected without full device control 
-  **3. Compliance policy enforced**
Minimum OS, encryption and PIN requirements set 
-  **4. Compliance feeds Conditional Access**
Non-compliant devices blocked from company data 
-  **5. MFA enforced via Conditional Access**
Required for every user, not left optional 
-  **6. Apps deployed automatically**
Core business apps installed with no manual step
