

Managed Firewall: What's Actually Included

A firewall nobody's touched since setup isn't protecting you the way you think

For businesses whose firewall was configured once and forgotten

KEY EVALUATION POINTS

Deployment

Sized and configured around your real traffic, not a default template.

Ongoing Maintenance

Firmware, patches and rule reviews on a defined schedule.

Change Control

Every rule change reviewed, approved, and logged with a rollback plan.

24/7 Monitoring and Support

Traffic watched around the clock with defined response times.

Backup and Recovery

Configuration backed up after every change and tested to restore.
